

CHILLFISH

WELCOME TO *WHITEPAPER*

¿WHAT IS \$CHILLFISH?

OVERVIEW

\$ChillFish is a meme token with the heart of a clownfish and the brain of a dolphin on vacation.

It doesn't promise utility, but it delivers vibes.

IMPORTANT CONCEPTS

This token isn't here to fix the economy.

It's here to make memes, reward the chill, and let the community ride the current.

CONTENT

01

Hold it

02

Stake it

03

Vote with it

04

Trade it

Tokenomics

06

Burn Mechanism

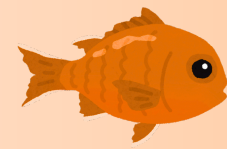

WHAT CAN YOU DO WITH \$CHILLFISH?

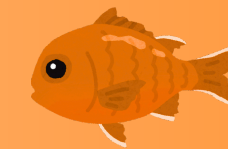

We are a decentralized token focused on the world of meme coins, sowing work, commitment, and focusing on the more pleasurable reality of providing a solid and effective mechanism for our audience.

- 01 Hold it – For the vibes. For the memes.
For the “maybe it moons” energy.
- 02 Stake it – Because passive income sounds fancier than “doing nothing.”
- 03 Vote with it – Help steer the reef.
Governance, but like... wet.
- 04 Trade it – DEX it, flex it, just don’t wreck it.

ROADMAP

FEBRUARY

Beginning of structure in design, planning and character composition.

Clear function and organization of the character, story, basis, focus and realization of the same.

MARCH

APRIL

Creation of a cryptographic mechanism, as a visualization in digital marketing, focused on memes and cryptocurrencies to achieve volatility and commitment to the project in audiovisual advertising.

Creation of mechanisms in programs, and web 3 functionality, to provide on-page programming, bots, and digital operation.

MAY

JUNE

Advanced advertising functionality, a complete mechanism, structural planning for burning tokens, and maintaining security directly within the project's CA, providing strategic security while complementing other parameters to deliver the best launch.

THANKS FOR COMING THIS
FAR, AND WELCOME TO THE
IMMERSIVE WORLD OF

\$CHILLFISH
